

The only planting system
that brings together efficiency,
safety, flexibility and financial
savings for you

*"I fully recommend
the Instaplanta
system"*

instaplanta

Revolutionising traditional planters

Instaplanta has revolutionised the traditional planter!

Unique in the market place, Instaplanta utilises a built-in reservoir, capillary action matting and a unique basket system.

Combine all these attributes to get a planting system that brings together efficiency, safety, flexibility and financial savings.

Instaplanta is designed with your most important asset in mind – your employees.

We all know that poor health and safety practices can lead to ill health and accidents at a great cost to your business. The flexibility that Instaplanta provides, vastly improves safety, reduces down time and avoids waste.

When opting for an Instaplanta product you will receive a superior planter with a multitude of additional benefits.

Health & Safety

- Reduces risk of accidents whilst carrying out roadside replanting.
- Enables off-site planting in a 'Safe Environment'.

- When changing planter baskets staff never come into direct contact with the growing medium, reducing risk of injuries caused by 'sharps'.
- Reduces risk of manual handling/repetitive strain injuries.

Environmental Benefits

- Reduces compost levels (approximately 70% less compost used).
- Self watering.
- Infestation of pest or disease can be dealt with both quickly and effectively.

Flexibility

- Allows you to change the planter quickly, using spare planting baskets.
- Enhances displays because fresh compost is used every season.
- Quality control is managed more effectively.
- Excellent for in 'In Bloom' groups who have elderly members or people with disabilities.
- Spare baskets can be planted and "grown on" in a safe and controlled environment prior to being placed on site.

Resource Savings

- Significantly reduces watering regimes.
- Increases staff productivity and efficiency.
- Materials – less growing medium used.
- Product – our planters are extremely competitive against all other suppliers.

Quality Guaranteed

Our planters are made from the highest quality Scandinavian Spruce and all the timber is FSC approved and comes with a 15-year guarantee. They are handmade in the UK by our experienced craftsmen.

The planter basket inserts are manufactured from Galvanne coated welded wire mesh and are lined with a geo-textile and capillary matting.

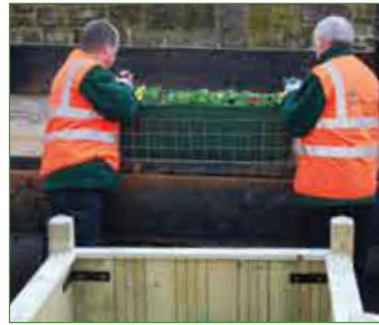

Bespoke Services

At Instaplanta we aim for 100% customer satisfaction, therefore if you can't find the exact product that you require, we offer a bespoke service that will cater to your every need.

For further information on our product range, please visit our website or contact us by phone or email.
